Technical Skills

Languages: Java, Python, Ruby, SQL, JavaScript/TypeScript, HTML/CSS
Technologies and Frameworks: Ruby on Rails, React.js, Next.js, React-Native, Node.js, Tailwind, Flask, Google Gemini
Developer Tools: Git, Github, Vercel, Postman, Expo Go, VS Code, IntelliJ, Jira, Dbeaver

Experience

Software Developer Co-op January 2025 – August 2025
Info-Tech Research Group *Toronto, ON*

- Developed a survey and report generation system in Ruby on Rails, collecting end-user data and automating report creation, enabling **30,000+** clients to make data-driven decisions.
- Implemented automated end-to-end tests with **RSpec** and **Capybara/Playwright** to validate system functionality, increasing test coverage and significantly reducing manual QA efforts
- Designed dynamic layouts and features using **JavaScript/Handlebars** templates to render survey data into client ready PDF reports
- Performed data migrations to support new feature development and executed SQL queries to analyze, identify and resolve **5+** data quality issues

Executive October 2023 – Present
Google Developer Group on Campus, TMU *Toronto, ON*

- Spearheaded the planning and execution of monthly events promoting **Google Development** technologies (eg. Firebase, Flutter, and Github workshops) attracting **150+** participants per event
- Managed logistical aspects of events, including venue coordination, volunteer organization, and external communications, ensuring seamless collaboration and successful event delivery.
- Lead an internal team of **4**, facilitating strategic meetings to define goals, allocate tasks, and optimize workflow efficiency, resulting in team productivity

Information Technology Support Technician September 2023 – August 2024
Toronto Metropolitan University CS Department *Toronto, ON*

- Conducted hardware and software installations for **500+** machines to optimize system performance and ensure a reliable computing environment
- Implemented network and operating system configurations while enforcing strict security measures within lab machines used by **6000+** students
- Ensured minimal downtime and optimal performance across all deployed systems by resolving potential hardware and software issues.

Projects

EcoEats | *React Native, Expo Go , Flask, Google Gemini, Azure Vision*

- Developed a mobile app enabling users to scan food items, leveraging AI tools such as **Azure Vision** and **Google Gemini** to analyze images with **95%** accuracy, identifying ingredients for CO2 emission calculations.
- Integrated a CO2 emissions dataset with **100+** items to provide users accurate environmental impact data, reducing manual food tracking time by **80%** and improving sustainability decision-making.

Gist | *JavaScript, React/Nextjs, Python, Flask, OpenAI*

- Designed a full stack web application that extracts concise information segments from a PDF document utilizing **AI** technology and prompt engineering with a **85%** accuracy to simplify learning
- Implemented a **Flask** server and a **Next.js** front end, leveraging **REST API** endpoints to retrieve files and return text data to the **OpenAI API** providing accurate content generation

Education

Toronto Metropolitan University September 2022 – April 2027
Bachelor of Science (Honours), Computer Science, Co-op *Toronto, ON*

- **Relevant Courses:** Web Systems Development, Data Structures, Intro to C and Linux, Databases, Intro to Software Engineering
